Kordan Asphalt has more than 60 years of experience in asphalt production and has been cooperating with hundreds of governmental and non-governmental institutions and companies since 1993 as Kordan Asphalt Company (Private Joint Stock) and has continued its activities. Currently, this company is one of the largest asphalt production companies in Alborz and Tehran provinces, employing hundreds of specialized and capable personnel, with an annual production capacity of more than 360,000 tons of asphalt.

In addition to production various types of asphalt and mineral materials, the company has achieved the Rank 3 in the field of Roads and Ways from Department of Civil Affairs of Tehran Governorate, indicating the long, highlighted professional background of this company in the road construction.

We plan to improve the asphalt production cycle through accurate study and location for optimal implementation of mechanical equipment and human resources, promoting the asphalt quality using an on-site equipped laboratory, observance of the occupational safety, and improving the environmental conditions through the knowledge of a on-site HSEQ unit for asphalt production, and establishing a constructive relationship with the machinery manufactures both inside and outside of the country, and communication with the Iranian and foreign researchers toward increasing the productivity, and updating the production method and product quality, while paying more attention of the society health with sponsorships of sport teams.

Asphalt Kordan is proud to declare itself as the First and Only Holder of Certificate for Integrated Management System (IMS), and always acts toward development of our dear Iran.

In order to provide high-quality services with existing facilities, Asphalt Kordan also provides executive services, including road infrastructure and pavement using state-of-the-art machinery and technology, in addition to asphalt production.

We are product to announce that Asphalt Kordan has always tries to play a role in development of Iran through its products.

In addition to 2500 tons daily production of various asphalt products, the company also extracts and produces various sand and gravel through its own mines.

The Mission of our R&D Unit is to improve the quality of Asphalt Kordan's products, provision of new products considering the current requirements of the organizations and our customers. For an instance, the colored and polymer asphalt, which is currently produced by this company.
